

CONFERENCE PROGRAM 2008

NEW !

Africa is one of the fastest growing regions of the world and this period stands out in Africa's history. It is a momentum change. More than 60% of the countries in Africa are functioning democracies. Economies are strengthening and diversifying as, fuelled by the commodity price boom and lower debt levels, currency stability improves.

At Africa Hedge Funds 2008, you will meet with top hedge fund managers investing in Africa. Africa Hedge Funds 2008 is the place to be for investors looking for diversification in 2008.

Russia is showing strong macro economics, a commodity boom, and major structural improvements particularly in the energy, telecom and electricity sectors, liquidity and volumes on the increase, a considerable increase of foreign investors, and an enhanced access to the market. This explains the outstanding results achieved by Russian and Eastern European hedge funds managers in the recent years. A proliferation of funds and an increased variety of strategies used by hedge fund managers make this region ever more attractive.

Hedge funds have taken the Far East by storm in the recent years, and nowhere as noticeable as in China, the world's fastest-growing economy. To date Hedge Funds are a significant part of Asian markets. In recent years they grew from less than 50 in 1995 to over 600 in 2008. Our China Hedge Funds Conference 2008 will offer a unique opportunity for those interested in the Chinese funds industry to establish invaluable contacts.

NEW !

With the opening of the fund industry in the Middle East, investors now have access to the best opportunities in the region, which offers huge opportunities for judicious managers and investors. At Middle East Hedge Funds 2007 you will get to meet many of the top-performing fund managers investing in the region. Who are the winning managers in the Middle East? What will the region's best-performing strategies be? The Middle East hedge fund industry has begun reshaping and it's anybody's game as markets pick up and investment pours in.

India's financial markets have had several excellent years and international investors are looking for opportunities with the best funds managers in India. India has opened its doors to hedge funds and the mutual fund industry. India is quickly progressing, with a solid macro basis, a population in excess of 1 billion, powerful market support and a future that industry experts are predicting to rival opportunities in China. To date the total assets of all Indian domestic funds stands at a healthy US\$ 50 billion. The booming capital market coupled with the strong development of the asset management industry has created exciting opportunities for investors.

Latin American funds have been among the best performers in recent years. The region offers strong economic growth rates, growing consumption markets and strong commodity reserves. The variety of funds that is available allows better selection opportunities and greater diversification. LatAm markets' strong volatility offers great opportunities for talented hedge fund managers. What will be the most performing strategy to invest in Latin America? The market is far from being saturated and it's anyone's guess as markets pick up and investments pour in.

Will you or your colleagues be attending the JetFin hedge fund events on Africa, China, India, Russia, Middle East or LatAm in 2008?
